Can Microsoft Teams help you?

Please follow us on social media for the latest updates!

Working remotely can present challenges, especially in the communications department. In a normal office setting, it is easy to walk over and speak with someone about the issue at hand. However, working remotely people often rely on email which may not have all features your business needs. That is where Microsoft Teams comes in.

Microsoft Teams is a communication and collaboration platform that combines:

- Chat capabilities
- Video conferencing
- File storage
- Integration with Office 365 apps
- A wide selection of third-party applications.

Microsoft Teams comes with the suite of software included in Office 365. If this is something you are interested in, we can help with the following:

- Purchasing an Office 365 license
- Remotely installing Office 365
- One-on-one or group training for Microsoft Teams done remotely

In addition, we will be available for questions once up and running.
